

MyndTec Inc. Fact Sheet

MyndTec Inc. is a privately held medical technology company located in Mississauga, Ontario, Canada, that develops and commercializes innovative therapeutic medical devices designed to improve function, maximize independence and enhance quality of life.

MyndTec's first product, MyndMove™, applies advanced principles of Functional Electrical Stimulation (FES) to assist patients suffering arm and hand paralysis following stroke or spinal cord injury (SCI) to make lasting gains in the recovery of natural, voluntary movement.

Leadership Team:

Steven Plymale (ICD.D), Chief Executive Officer – 25+ years of experience in Medical Technology including Xltex (Natus Medical), and CryoCath (Medtronic), and Claron Technology. He has previously guided Profound Medical through its start-up phase to become a publicly traded company on the Toronto Venture Exchange.

Ron Kurtz, Vice President, Engineering - 25+ years of experience in Engineering management and design for complex multidisciplinary systems, primarily focused on medical devices. Prior to joining MyndTec Inc., Mr. Kurtz was VP Engineering and VP R&D for Profound Medical Inc., and Director of Engineering for Xltex (Natus Medical).

Dr. Milos R. Popovic (Ph.D., P.Eng, FAIMBE, FCAE), Chief Technology Officer & Co-Founder - currently the Director of the KITE Research Institute, Toronto Rehabilitation Institute, where he developed the FES system and has conducted numerous randomized control trials to demonstrate its efficacy. He is a leading authority in the field of FES therapy, and currently manages one of the largest FES clinical research centers in the world.

Scott Franklin, Chief Financial Officer - 25+ years of experience in financial management, operations and accounting for public and private companies.
