

Coding and Reimbursement

Devices provided by MyndTec do not have a unique reimbursable code. A therapist would bill one of the following codes for the patient's treatment. Most of these are billed in 15 minute increments, based on the length of the procedure.

Note: this information is intended as guidance only. There is no guarantee of payment. Please consult the government entity, insurance carrier or benefits provider before treatment for coverage or payment.

United States:

CPT Code	Description
97110	Therapeutic Exercise.
97112	Neuromuscular Re-education.
97116	Gait Training Therapy.
97530	Therapeutic Activities.

Canada:

Please check with your insurance carrier of benefits provider for coverage.

Government-funded physiotherapy services.

Some hospitals in Canada have outpatient clinics with rehabilitation programs for patients recovering from stroke or an injury. Check with your local hospital or at https://www.health.gov.on.ca/en/public/programs/physio/pub_clinics.aspx for available Government-funded physiotherapy services in your area.

Details on how to qualify for or access Government-funded physiotherapy check https://www.ontario.ca/page/get-physiotherapy?_ga=2.64594727.960644187.1664294928-419935654.1664294928

Assistive Device Program (ADP)

Under the Assistive Devices Program the Government of Ontario helps cover the costs of reciprocating gait orthoses, specifically hip-to-foot brace systems that support and condition muscles and joints used to walk.

In addition to the above, you must have **primary or secondary lymphedema, or hypertrophic (raised, burn-related) scarring**. (Pumps are funded for primary lymphedema only.)

Patients already receiving support from WSIB or Group A veterans already covered under Veteran Affairs Canada do not qualify for the ADP. Please check the following link for more information: <https://www.ontario.ca/page/garments-pumps-and-braces#section-3>.
